Allowance

1. Acknowledgment is made of applicant's Amendment, filed 14 October 2005. The changes and remarks disclosed therein were considered.
2. The replacement-drawing sheet for Figure 2 was received on 14 October 2005. The drawing in the replacement sheet is acceptable.
3. Claims 1-9 are pending in the application.
4. Claims 1-9 are allowance.

The following is an examiner's statement of reasons for allowance:

There is no teaching or suggestion in the prior art to: **“applying a first negative voltage to the bit line and switching on the select transistor so that the first negative voltage is passed to the drain region wherein the second positive voltage or programming current leads to a forward bias capable of turning on a parasitic bipolar transistor that includes the source region, the drain region and the N-well, and a reverse bias between the drain region and the N-well is capable of generating an electron current between the source region and the drain region for injection into the floating gate”** in a method of programming a P-channel EEPROM as claimed in the independent claim 1. The dependent claims 2-5 are also allowed; or

“applying a first negative voltage to the drain region wherein the second positive voltage or programming current leads to a forward bias capable of turning on a parasitic bipolar transistor that includes the source region, the drain

region and the N-well, and a reverse bias between the drain region and the N-well is capable of generating an electron current between the source region and the drain region for injection into the floating gate” in a method of programming a P-channel EEPROM as claimed in the independent claim 6. The dependent claims 7-9 are also allowed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
